Commands

The following tables provide an alphabetical list of commands available on the AT-OME-SR21.

Commands can be sent using RS-232 or Telnet.

There should be a 0.5 second delay between each command sent to the unit.

Default port for Telnet is 23.

Default port for SSH is 22.

Each command is case sensitive, do not change: capitalization, spacing, or lettering.

Each command is terminated with a carriage return.

If the command fails or is incorrect the feedback should be "Command FAILED:" followed by the sent command.

 **IMPORTANT:** Each command is terminated with a carriage-return (0x0d) and the feedback is terminated with a carriage-return and line-feed (0x0a).
